PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in Python, SQL, statistics, and data structures, backed by hands-on experience in data preprocessing, feature engineering, and building predictive models with Scikit-learn on real-world datasets. Experienced in working with PostgreSQL databases and building end-to-end data pipelines that feed into analytics dashboards and machine learning models. Comfortable analyzing data, evaluating model performance, and communicating insights, with a track record of building and shipping real projects independently. Strong analytical and problem-solving skills, quick learner, adaptable, and eager to contribute from day one.

TECHNICAL SKILLS

Programming & Databases: Python (proficient), SQL, JavaScript, PostgreSQL, SQLite

Data Processing & Visualization: NumPy, Pandas, Data Preprocessing, EDA, Statistical Analysis

Machine Learning: Machine Learning, Deep Learning, ANN, CNN, NLP, LLMs, Predictive Analytics, Feature Engineering, Feature Extraction, Model Evaluation Metrics

ML Frameworks: TensorFlow, PyTorch, Scikit-learn, Keras

Web Frameworks & Tools: Django, Flask, OpenCV, Git, GitHub, Jupyter Notebook, VS Code, Docker (Basics)

Soft Skills: Communication, Self-Learning, Teamwork, Adaptability, Problem-Solving, Time Management

Languages Known: English, Tamil, Malayalam

INTERNSHIP EXPERIENCE

Agile Info Tech Solutions LLP, Thycaud, Trivandrum

August 2025 – Present

Full Stack & Data Science and AI Intern

- Wrote Python scripts for data preprocessing and analysis on real-world datasets, applying core programming and problem-solving skills.
- Built and evaluated machine learning models using Scikit-learn as part of applied AI projects, gaining exposure to the full development lifecycle.
- Built and integrated backend features into Django web applications, working with PostgreSQL databases and REST APIs.

PROJECTS

Live Civilians Emergency Response System (LCERS) | Disaster Management Web Application

- Developed an end-to-end disaster prediction pipeline using Python, Random Forest, and real-time weather APIs, achieving 82% prediction accuracy.
- Performed data preprocessing, feature engineering, and model evaluation on historical and real-time disaster datasets to improve prediction performance.
- Integrated Mapbox, Firebase, Twilio, and Visual Crossing APIs into a Flask web application for real-time alerts, route planning, and emergency communication.

Tech Stack: Python, Flask, HTML, CSS, JavaScript, Scikit-learn, Machine Learning, SQLite, Firebase, Mapbox API, Twilio.

AURAGLYPH | AI-Enabled Multi-Vendor E-Commerce Platform

- Built **10+ core platform features** including product management, cart, wishlist, checkout, order tracking, and user authentication using Django and PostgreSQL.
- Implemented **4+ Data Science modules** including customer segmentation, sales forecasting, product recommendation, and value-for-money analysis using Python.
- Developed an interactive analytics dashboard with revenue trends, customer insights, category distribution, and predictive visualizations, enabling data-driven business decisions. Managed version control and collaborative development using Git/GitHub.

Tech Stack: Python, Django, HTML, CSS, Machine Learning, Chart.js, Plotly, PostgreSQL, Bootstrap, JavaScript, Git, GitHub.

EDUCATION

Marthandam College of Engineering and Technology, Kuttakuzhi

B.E. Computer Science & Engineering (Anna University) | 2022 – 2026 | CGPA: **7.94 / 10**

Government Higher Secondary School, Palukal, Kanyakumari (2020 – 2021)

Higher Secondary | **75.16%**
